Diet and Nutrition Care Manual

A Message to our Readers

Thank you for using the 2021 edition of this manual, which has been revised to reflect the most current evidence based research and national/international guidelines for nutrition. Updates include (but are not limited to) the *Dietary Guidelines for Americans (DGA), 2020-2025*, current guidance for cardiovascular disease/prevention, diabetes/diabetes prevention, kidney disease, pressure injury prevention and treatment, and the International Dysphagia Diet Standardisation Initiative (IDDSI).

This manual covers all stages of the life cycle. However, since so many health practitioners serve older adults in outpatient, acute, and post-acute care settings such as continuing care retirement communities, nursing and assisted living facilities, sub-acute, transitional care and rehabilitative settings, we have incorporated notes on each diet regarding the need to individualize and provide the least restrictive diet appropriate for each older adult. Recommendations for individualization are based on a comprehensive nutrition assessment by a registered dietitian nutritionist (RDN) with assistance as appropriate from the nutrition and dietetics technician, registered (NDTR), and orders from the physician.

Food can have a major impact on quality of life for older adults especially for those with acute, severe chronic or end stage conditions. Each individual has their own special relationship with food, including social, psychological, cultural and religious associations. *The DGA, 2020-2025* recommend that individuals customize food and beverage choices to reflect personal preferences, cultural traditions, and budgetary considerations. This message reflects the unique diversity of our nation (and our patients), and is repeated throughout the text. For older adults in health care communities, the goal should be to increase quality of life and enjoyment of food, while still providing excellent nutrition care. This can be accomplished by providing the least restrictive diet possible with a focus on person centered dining that includes food choice as well as choice of dining times, dining partners, and assistance at mealtime.

Every health care provider is unique, and the population each provider serves is also unique. In order to meet the varied needs of practitioners, we offer many diet choices and additional helpful nutrition care information. This manual was designed to assist the practitioner to:

1. Provide appropriate medical nutrition therapy (MNT) while enhancing quality of life.
2. Interpret diet prescriptions and implement appropriate nutrition care.
3. Understand the role of MNT in treating various diseases and conditions.
4. Determine the best approach for MNT based on individualized assessment of nutritional and other needs.

We hope that the suggestions in this manual will help satisfy individual patients/residents, clients, families, physicians and regulators, while providing an excellent resource for professional staff.

This manual is dedicated to the many individuals we have had the opportunity to serve through our nursing facilities, hospitals, assisted living facilities, hospices, home health agencies, group homes and other settings for almost 40 years. Our mission has always been to improve the quality of life of the people we serve through excellence in nutrition care. Our hope is that this manual will help its users achieve a similar goal.

We Welcome Your Comments!

In our constant effort to serve your needs and improve future editions of this manual (including incorporating more emphasis on meeting the needs of our increasingly diverse population), your comments are always appreciated. Please send them to:

License Agreement and Restrictions

YOU SHOULD CAREFULLY READ THE FOLLOWING TERMS AND CONDITIONS BEFORE USING THIS MANUAL AND CD-ROM OR OTHER ELECTRONIC VERSIONS. USING THIS MATERIAL INDICATES YOUR ACCEPTANCE OF THESE TERMS AND CONDITIONS.

LICENSE. The materials that are the subject of this Agreement (hereinafter referred to as the “Licensed Materials”) shall consist of printed materials, electronic information, audio or video/DVD information or published information in any form by Becky Dörner & Associates, Inc. (hereinafter referred to as BD&A). Licensee and its Authorized Users acknowledge that the copyright and title to the Licensed Materials and any trademarks and service marks relating thereto remain with BD&A. Neither Licensee nor its Authorized Users shall have right, title or interest in the Licensed Materials except as expressly set forth in this agreement. In consideration of payment, BD&A hereby grants Licensee a non-exclusive, non-transferable, and revocable License to make permitted use of the Licensed Materials and to provide the Licensed Materials to Authorized Users in accordance with this Agreement.

USAGE. The Licensee shall ensure that only Authorized Users are permitted access to the Licensed Materials. Licensee may install and/or use Licensed Materials based on the agreed upon number of Authorized Users per terms of the Purchase Agreement, Letter of Agreement or Invoice. Licensee is not permitted to make unauthorized copies, alterations or modifications to the Licensed Materials unless specified in the Users’ Manual or by prior written authorization of BD&A. Other than as specifically permitted in this Agreement, Licensee may not use the Licensed Materials for commercial purposes, including but not limited to the sale of the Licensed Materials or bulk reproduction or distribution of the licensed materials in any form.

MATERIAL CONTENT. The Licensed Materials are provided for your own personal, educational non-commercial use as a resource aid only. If you intend to use this material for the nutritional needs of an aged, sick or injured person or a person who suffers from a chronic disorder or disease, you should first consult that person’s physician or physicians and if none, a physician who practices in the applicable field of medicine.

The Licensed Materials are in the nature of general concepts and, therefore, where its use may be appropriate for one person, its use may not be appropriate for another. The Licensed Materials are not intended to be a substitute for professional medical advice. Consequently, BD&A shall not be liable for any loss or damage directly or indirectly to the Licensee or Authorized Users of any material or information contained in the licensed materials.

LIMITATIONS ON WARRANTIES. BD&A shall not be liable to the Licensee for any indirect, special, incidental, punitive or consequential damages, including but not limited to loss of data, business interruption, or loss of profits arising directly or indirectly from or in connection with the license granted under this Agreement. The forgoing applies regardless of whether the claim or damages result or arise under breach of contract, tort, or any other legal theory.

BD&A makes no representation or warranty, and expressly disclaims any liability with respect to the content of any Licensed Materials, including but not limited to errors or omissions contained therein, libel, infringement of rights of publicity, privacy, trademark rights, moral rights, or the disclosure of confidential information. Except for the express warranties stated herein, the Licensed Materials are provided on an “as is” basis, and BD&A disclaims any and all other warranties, conditions, or representations (express, implied, oral or written), relating to the Licensed Materials or any part thereof, including, without limitation, any and all implied warranties of quality, performance, merchantability or fitness for a particular purpose. BD&A makes no warranties respecting any harm that may be caused by the transmission of computer virus, worm, time bomb, logic bomb or other such computer program. BD&A further expressly disclaims any warranty or representation to Authorized Users, or to any third party.

ACKNOWLEDGEMENT. THE LICENSEE AND AUTHORIZED USERS ACKNOWLEDGES THAT THEY HAVE READ THIS LICENSE, UNDERSTAND IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS.

Diet and Nutrition Care Manual

Acknowledgements

Author/Editor:

Becky Dorner, RDN, LD, FAND is widely-known as one of the nation's leading experts on nutrition, aging, and long-term health care. An extensively published author and experienced speaker, Becky is Founder/President of Becky Dorner & Associates, Inc., which provides a broad library of credible continuing education (CE) programs and nutrition resources. She was also Founder/President of Nutrition Consulting Services, Inc., whose dedicated team of RDNs/NDTRs served health care facilities in Ohio from 1983-2020.

Becky has published more than 300 health care articles, manuals, and CE programs; presented and/or hosted more than 650 CE programs for national, international, and state professional meetings in 5 countries and 50 states. Her free email magazine keeps 30,000 health care professionals up to date on the latest news in the field. An active leader, she has held more than 20 board positions on national and state professional associations including the Academy of Nutrition and Dietetics (Academy) and the National Pressure Injury Advisory Panel. Honors include: Academy Medallion Award, Fellow of the Academy of Nutrition and Dietetics, and the Academy Award of Excellence in Business and Consultation.

Editor:

Liz Friedrich, MPH, RD, CSG, LDN, FAND, NWCC is a registered dietitian and president of Friedrich Nutrition Consulting in Salisbury, NC. The company provides a variety of nutrition consulting services with a focus on gerontological nutrition.

Liz is Board Certified as a Specialist in Gerontological Nutrition and is Nutrition Wound Care Certified. She has authored and co-authored numerous articles in journals and magazines and textbook chapters and has served as an evidence analyst for the Academy of Nutrition and Dietetics (Academy) Evidence Analysis Library. She is an accomplished speaker on topics related to both older adults and wound healing. Liz has held numerous national and state positions for the Academy, Nutrition Entrepreneurs Dietetic Practice Group, and the North Carolina Academy of Nutrition and Dietetics. She is the recipient of two NCDA awards, the Recognized Young Dietitian of the Year and the Member of the Year.

Reviewers/Contributors:

We would like to thank the following professionals for their time, effort and dedication to current and past editions of this manual. We hope that the individual residents, patients, and/or clients that you work with will benefit as a result of their hard work.

Diet and Nutrition Care Manual

Review and Approval

This manual has been reviewed and approved for use in the following facility:

Facility Name

Address

The diet and nutrition care manual should be reviewed and approved annually by the registered dietitian nutritionist, nutrition and dietetics technician, registered, director of food and nutrition services, director of nursing, speech language pathologist, medical director, and the administrator (as applicable). The therapeutic diet prescriptions generally utilized are described in this manual.

The diet and nutrition care manual should be revised at least every three to five years, and should be accessible to both the food service and nursing staff. Copies of the manual should be available in the foodservice and nutrition departments, as well as the nursing office and nurses' stations as appropriate.

Diet and Nutrition Care Manual

Consistent Carbohydrate Diet

Individuals with diabetes or difficulty controlling blood glucose (BG) levels may be placed on a consistent carbohydrate diet. This diet provides meals of consistent carbohydrate amounts at consistent times throughout the day. These guidelines are intended for use with adults. Provide adequate nutrients as recommended by the *Dietary Guidelines* and National Research Council by using these guidelines to provide three balanced meals and up to three snacks daily:

Food	Amount Each Day*
Vegetables (include more dark green/leafy, red/ orange non-starchy vegetables; dry beans/peas/lentils)	≥2 ½ cups or equivalent
Fruits (include a variety; with more whole fruit than juice as appropriate) Fresh, frozen or canned in natural juice or water pack.	≥2 cups or equivalent
Grains (include as much whole grain/enriched as possible; at least half of grains should be whole)	≥6 oz or equivalent
Dairy (fortified with vitamins A and D) Encourage fat free or low fat as appropriate.	3 cups or equivalent
Protein Foods (i.e., fish, seafood, lean meat, poultry, eggs, dry beans/peas/lentils, soy products, nuts)	5-6 oz or equivalent Encourage 8 oz of cooked seafood per week.
Sodium, Saturated Fat, Added Sugars, Alcohol Limit added sugars/saturated fats, reduce sodium. Less than 10% of calories from sugar daily. Most fat should come from healthy oils. Sucrose or sugar-containing foods must be counted into the total carbohydrate for the day.	Use in limited quantities to round out the menu for pleasing appearance and satisfying meals. Alcohol in moderation as appropriate (Women: up to 1 drink/day, Men: up to 2 drinks/day) and as approved by physician.
Fluids (especially water) low in simple sugars, sugar-free flavored waters, carbonated beverages	Fluids based on individual needs.

***These amounts are recommended based on a 2000 calorie meal plan by MyPlate.gov. See pages 5-26 to 5-35 for specific food amounts. Follow menus/recipes approved by RDN.**

Recommended Nutritional Composition	
Calories¹ ~2000, adjust based on individual need	Fiber 25-35 g
Carbohydrates 225-300 gms 45-55% of calories	Sodium³ 2300 mg
Protein² 10-35% of calories	Calcium⁴ ≥1000-1200 mg Vitamin D⁵ 600-800 IU
Fat 20-35% of calories <10% of calories from saturated fat	Vitamin A F 700/M 900 mg RAE Vitamin C 90 mg Potassium 4700 mg
Nutrients may vary day to day, but should average to the above estimates. Added sodium, saturated fats, sugars, and alcohol will alter nutritional composition.	

- ◆ Adjust diet as needed based on individual goals.
- ◆ Carbohydrates should be spread evenly throughout the day.
- ◆ Use a wide variety of nutrient dense foods (fruits, vegetables, whole grains, dairy products, cooked dry beans/peas/lentils) rich in vitamins, minerals, and dietary fiber.
- ◆ Supplement based on individual need: multivitamin or multivitamin with minerals, calcium, vitamin D, and B₁₂ in older adults.
- ◆ Older adults may need individualized/less restrictive diets especially if intake is poor. Honor food preferences and cultural norms within reason.

¹Depends on activity level and other factors.

²Based on individual needs.

³Sodium intake will be higher with processed foods/added salt. For individuals with hypertension further reduction to 1,500 mg sodium per day can result in even greater blood pressure reduction.

⁴Calcium: 1200 mg for females 51+, 1000 mg for males 51+ and 1200 mg for males 71+.

⁵Vitamin D: 600 IU for 51+ and 800 IU for 71+.

Diet and Nutrition Care Manual

Consistent Carbohydrate Diet

Foods Allowed	Serving Size	CHO, grams	Foods to Limit/Avoid
Protein Foods (Fat free or low fat as appropriate.) Meat and Meat Alternates Fish, chicken, turkey, lean beef, pork or veal Cheese, low fat Cottage cheese, low fat Eggs	2-3 oz 2 oz ½ - ¾ cup 2-3	0	High fat meats Fried foods
Dairy Milk (Fat free or low fat - skim, 1%, 2%) Yogurt (low fat, sugar free) Yogurt (light)	1 cup 1 cup 1 cup	12	Whole milk High fat yogurt or yogurt with added sugar.
Fruits, fresh Apple, nectarine, orange, peach, small Banana or mango, small Cherries Grapefruit, large Grapes, small Kiwi, large Pineapple Tangerines, small Berries, fresh Blueberries, blackberries Raspberries Strawberries Canned , fruits packed in water or juice Dried Apricot halves Dates or prunes, medium Raisins Melons Cantaloupe or honeydew, cubes Watermelon Juice (100% juice) Apple, grapefruit, orange, pineapple, Cranberry juice cocktail, 100% juice blends, Grape, prune	1 ½ 12 ½ 12-15 (½ c) 1 ¾ cup 2 ¾ cup 1 cup 1 cup ½ cup 8 (1 oz) 3 1 Tbsp 1 cup 1 ¼ cup ½ cup ⅓ cup	15	Juice with added sugars (Note: serving size for 100% juice is only 1/3 to ½ cup). Fruits packed in heavy syrup (frozen or canned).
Vegetables , cooked or juice (prepared without added fat or carbohydrates) Raw	½ cup 1 cup	5	Fried vegetables

Diet and Nutrition Care Manual

Consistent Carbohydrate Diet (continued)

Foods Allowed	Serving	CHO, grams	Foods to Limit/Avoid
Grains/Starch (Fat free, low fat and/or low sugar as appropriate.) Bread (white, wheat, rye, oatmeal, etc.) Bun or English muffin Bagel Pita or tortilla (6 inch), plain roll (small). Baked beans Pasta, rice cooked. Corn, peas, potatoes, yams, lentils, garbanzo, or black eyed peas. Winter squash or mixed vegetables. Bran cereals, shredded wheat or cooked cereals. Other ready to eat, unsweetened cereals.	1 slice $\frac{1}{2}$ $\frac{1}{4}$ 1 $\frac{1}{4}$ cup $\frac{1}{3}$ cup $\frac{1}{2}$ cup 1 cup $\frac{1}{2}$ cup $\frac{3}{4}$ cup	15	Any with additional sugars, glazes, frostings, syrups, sauces.
Grains/Starch– Snack Options Graham crackers (2½" square) Soda crackers Pretzels Popcorn, popped, no fat added. Vanilla wafers Frozen yogurt Ice cream, ice milk, light OR sugar-free pudding with low fat milk. Cookie	3 6 $\frac{3}{4}$ oz 3 cups 5 $\frac{1}{3}$ cup $\frac{1}{2}$ cup 4 small or 1 large		
Fats and Sugars Butter, margarine, oil or mayonnaise. Salad dressing or cream cheese. Cream, sour cream	1 tsp 1 Tbsp 2 Tbsp	0	Limit amount of trans fat in diet. High fat, high sugar foods (cake, cookies, candy, sugar, regular soda pop).
"Free Foods" Sugar free soda pop, soft drinks, gelatin, club soda, coffee, or tea. Fat free bouillon, consommé Sugar Free gum Vinegar, herbs/spices, mustard, horseradish, or nonstick pan spray.	As desired As desired As desired As desired		
Free Foods in Limited Amounts Catsup or taco sauce Whipped topping, sugar free pancake syrup, or low calorie dressing. Sugar free jam or jelly. Sugar free pickles. Sugar free hard candy.	1 Tbsp 2 Tbsp 2 tsp 1 serving 1 piece	Minimal in the amounts allowed.

Diet and Nutrition Care Manual

Sample Daily Meal Plan for a Well Balanced Consistent Carbohydrate Diet**

Meal Pattern		Carbohydrate Controlled Diet	CHO	Carb Count
Breakfast	1 Fruit	½ c Orange Juice	15	1
	2 Grain/Starch	½ c Oatmeal	15	1
		1 Slice Whole Wheat Toast	15	1
	1 Meat/Alternative	¼ c Scrambled Eggs	0	0
	Free Food	Sugar Free Jelly	0	0
	1 Fat	1 tsp Margarine*	0	0
	1 Low Fat Milk	1 c Light Yogurt (no sugar added)	12	1
	Salt, Pepper, Sugar Substitute	Pepper, Sugar Substitute +	0	0
	Free Beverage	Sugar Free Beverage	0	0
			67	4
Lunch	2 oz Meat or Equivalent	2 oz Baked Chicken	0	0
	2 Grain/Starch	⅓ c Seasoned Rice	15	1
		½ c Seasoned Peas w/Mushrooms	15	1
	1 Free Food/1 Fat	1 c Green Salad w/1 Tbsp. Dressing	5	0
	1 Grain/Starch	1 small roll	15	1
	1 Low Fat Milk or 1 Fruit	½ c Ice Milk	15	1
	Salt, Pepper, Sugar Substitute	1 c Low Fat Milk	12	1
	Free Beverage	Pepper, Sugar Substitute +	0	0
		Sugar Free Beverage	0	0
			77	5
Dinner	1 Grain/Starch	6 oz Vegetable Soup	5	0
	3 oz Meat or Equivalent	3 oz Baked Fish	0	0
	1 Grain/Starch	½ c Mashed Potatoes	15	1
	1 Vegetable	½ c Green Beans Almondine	5	0
	1 Grain/Starch	6 crackers	15	1
	1 Fruit	1 Small Baked Apple (sugar substitute)	15	1
	1 Low Fat Milk	1 c Low Fat Milk	12	1
	Salt, Pepper, Sugar Substitute	Pepper, Sugar Substitute	0	0
	Free Beverage	Sugar Free Beverage	0	0
			67	4
P.M. Snack	1 Grain/Starch	3 (2 ½") Squares Graham Crackers	15	1
	1 Meat Alternative	2 Tbsp peanut butter	0	0
			15	1
Total CHO, g			226	15

Bold/italicized food items and/or portions indicate differences from Regular Diet menu.

*Low in saturated fats and trans fats

+Condiments may include pepper or other spices, sugar substitute, salt, coffee creamer, etc. based on nutrition goals. Additional condiments and garnishes (i.e., margarine, gravy, sauces, ketchup, etc.) may round out the menu and make it more appealing and palatable. These add additional calories, added sugars, micro- and macronutrients and may not be appropriate for some individuals.

**When planning a consistent carbohydrate diet, it can be difficult to meet the *Dietary Guidelines for Americans* (DGA) (see *Chapter 1: Regular Diet and Alterations*) recommendations while controlling carbohydrate intake. In the menu above, fruit servings are lower than recommended by the DGA to provide 3 to 4 carbohydrates per meal. This can be adjusted (for example, decrease grain servings and increase fruit servings) as appropriate to meet individual and/or facility preferences as long as the carbohydrate content remains consistent.
