

Your Premier Senior Nutrition Resource

Cost Savings of New My Choice eMenus!

Cost Savings of Cloud Computing

It's like having an external Food/Dining Services Office without the added cost!

- No up-front costs for equipment or software
- Security, updates and data integrity are all part of the cloud service, reducing support needed from internal IT department
- There are no extra fees for updates or training. As new updates and features are available everyone on the cloud automatically receives the updates
- Easily implemented in a large organization because of its scalable platform
- For Resident Manager Module, pricing of the cloud service is based on actual daily census –you are billed for what you actually use and nothing more

Internal Savings

Our new cloud based menu system saves time and money!

- Saves time! It's convenient and portable – the cloud based system it can be accessed on the Internet through a web browser on any device (smart phone, iPad, notebook, desktop, etc.)
- Tracks food costs automatically so you can target cost effective solutions
- Reduces dietary staff labor by fully automating sorting of labels and traycards by multiple locations; and eliminating redundant record keeping
- Reduces food waste because the cloud based software creates accurate lists for food and supplements
- Reduces RDN time by automating the therapeutic diets and nutritional analysis
