

Course Description: Malnutrition affects population and individual health at every level of the care continuum. Medicare and other healthcare payers provide payment incentives for care that is delivered in a cost-effective manner and provides high-quality outcomes. Accurate coding of complications and comorbidities, like malnutrition, can more accurately predict expected cost of care and improve quality measurement scores for individual providers and healthcare facilities.

This webinar explains the payment structures that can be improved in hospitals, inpatient rehabilitation and long-term care facilities, and ambulatory care clinics when malnutrition is accurately identified and documented. Best practices for medical record documentation will be shared to enhance the recognition of malnutrition when it is "present on admission". Attendees will be prepared for the new payment models that will be introduced by Medicare in the new federal fiscal year.

Course Objectives:

After completing this continuing education course, the learner should be able to:

1. Compare and contrast the ways malnutrition coding can influence payment and quality measurements in hospitals, rehabilitation and long-term care facilities, and outpatient programs.
2. Organize medical record documentation to manage, evaluate, assess, and treat - or "MEAT" - regulatory requirements and decrease coding and payment denials.
3. Demonstrate recognition of malnutrition as being "present on admission".

Speaker: Wendy Phillips, MS, RD, CD, CNSC, CLE, NWCC, FAND has no relevant disclosures to report. She has certified that no conflict of interest exists for this program.

Professional Approvals:

Becky Dorner & Associates, Inc. has been a Continuing Professional Education (CPE) Accredited Provider (NU004) with the Commission on Dietetic Registration since 2002.

This course is intended for: RDNs, CDEs, NDTRs	CDR Activity Type and Number: 175 Recorded webinar Activity number 149504
Course CPE Hours: 1.0	CDR Level: 2
Suggested CDR Learning Needs Codes: 1080, 4070, 7000, 7170	Suggested CDR Performance Indicators: 8.2.5, 8.3.5, 14.2.6, 14.2.7

Note: Numerous Other Learning Needs Codes and Performance Indicators May Apply.

How to Complete a CPE Course: <https://www.beckydorner.com/continuing-education/how-to-complete-cpe/>

Expiration Date: May 8, 2022.

MALNUTRITION DOCUMENTATION THROUGHOUT THE CARE CONTINUUM
IMPROVING PAYMENT AND QUALITY OUTCOMES

May 9, 2019, 2-3 PM ET

PRESENTED BY
Wendy Phillips, MS RD CD CNSC CLE NWCC FAND
 Division Director of Clinical Nutrition for Morrison Healthcare

About the Speaker
Wendy Phillips

Wendy Phillips, MS, RD, CD, CNSC, CLE, NWCC, FAND, is a Division Director of Clinical Nutrition for Morrison Healthcare. She provides regulatory and program development support for hospitals, rehab and long-term care facilities, and outpatient nutrition programs throughout the country. Wendy has held many roles within the nutrition and dietetics profession, including leadership positions for the Academy of Nutrition and Dietetics, Dietitians In Nutrition Support, and the Pediatric Nutrition Practice Group, to name a few. With over 40 peer-reviewed articles and book chapters published, Wendy is an expert on the topics of malnutrition, ADHD, wound care, and public policy.

2

Objectives

After this presentation, participants will be able to:

1. Compare and contrast the ways malnutrition coding can influence payment and quality measurements in hospitals, rehabilitation and long-term care (LTC) facilities, and outpatient programs.
2. Improve medical record documentation to Manage, Evaluate, Assess, and Treat (or "MEAT") regulatory requirements and decrease coding and payment denials.
3. Improve the recognition of malnutrition as being "present on admission."

3

Definition of Terms

ICD-10: International Classification of Diseases, 10th revision

- An international system adapted for use in the US; translates all diagnoses, symptoms, and medical procedures into numerical codes.

DRG: Diagnosis Related Group

- Defined by Medicare, patients are placed into groups based on the principle diagnosis causing hospital admission.

CC and MCC: Complication or Comorbidities, or Major Complications or Comorbidities

- Secondary diagnoses classified based on severity level. MCC is the higher severity level.

4

Definition of Terms

MS-DRG: Medicare Severity-Diagnosis Related Group

- Defined by patient attributes including the principle diagnosis, secondary diagnoses, medical procedures, sex, and discharge status.

RW: Relative Weight

- A value assigned by Medicare to each MS-DRG to reflect the expected severity level and calculate payment.

CMI: Case Mix Index

- The average of RWs for MS-DRGs for all patients discharged from the hospital in that year.

5

Definition of Terms

LOS: Length of Stay

- The number of days a patient spends in the hospital.

SOI: Severity of Illness

- The extent of physiologic decompensation of an organ system or disease state. Categorized as minor, moderate, major, or extreme, SOI provides a baseline to evaluating hospital resource use or establish patient care guidelines.

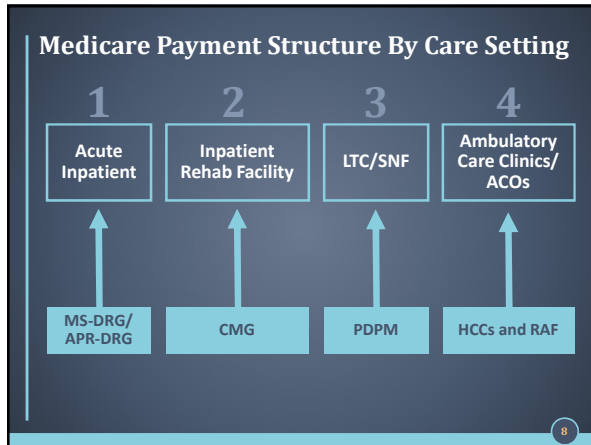

ROM: Risk of Mortality

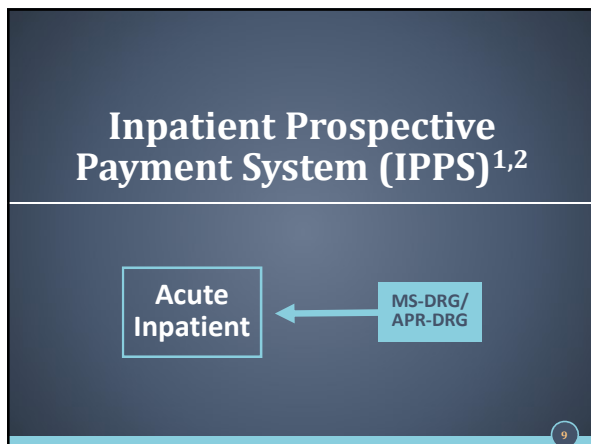

- Medicare's estimate of the likelihood of dying for patients within a diagnostic group.

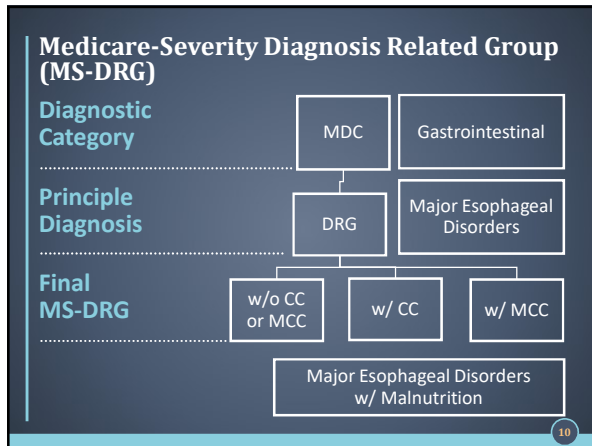

6

Malnutrition codes that are MCCs	Malnutrition codes that are CCs
Kwashiorkor (E40)* SOI/ROM: 4/3	Moderate protein-calorie malnutrition (E44) SOI/ROM: 3/2
Nutritional marasmus (E41)* SOI/ROM: 4/3	Mild protein-calorie malnutrition (E44.1) SOI/ROM: 2/1
Marasmic kwashiorkor (E42)* SOI/ROM: 4/3	Unspecified protein-calorie malnutrition (E46) SOI/ROM: 3/2
Unspecified severe protein-calorie malnutrition (E43) SOI/ROM: 4/3	Sequelae of protein-calorie malnutrition (E64)

*Rarely occur in the U.S.; these codes should only be used with extensive documentation proving the diagnosis

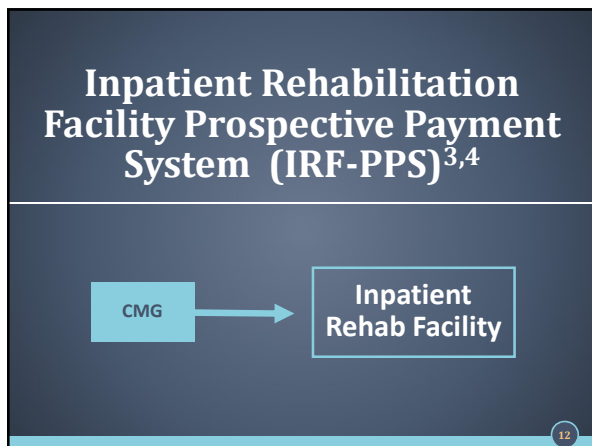

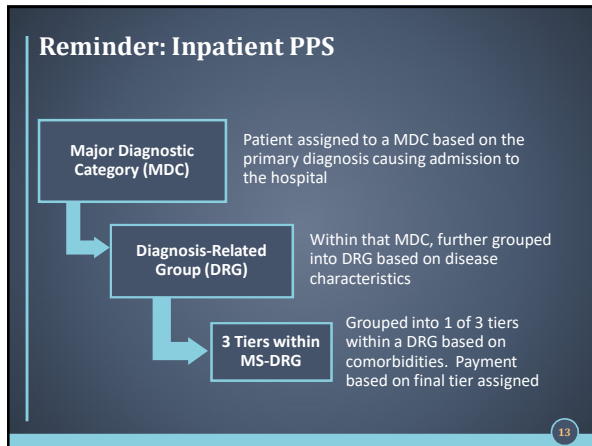

All Payer Related Diagnosis Related Groups (APR-DRGs)

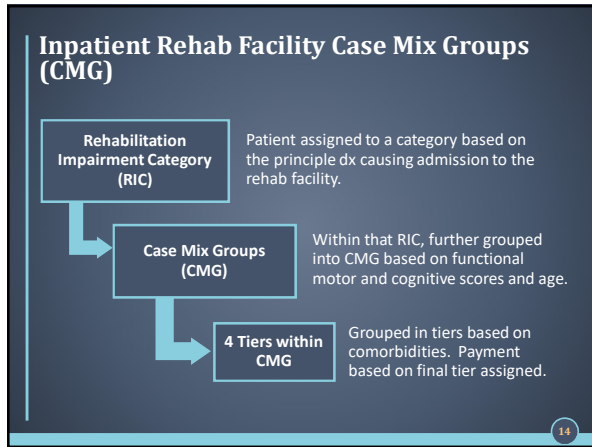

- Non-Medicare populations (i.e. neonatal and maternity)
- Can have a different admit vs discharge APR-DRG – focus on Present on Admission conditions
- 4 subclasses for each Base APR-DRG
- SOI and ROM assignment accounts for interaction among principal and secondary diagnoses, age, and procedures

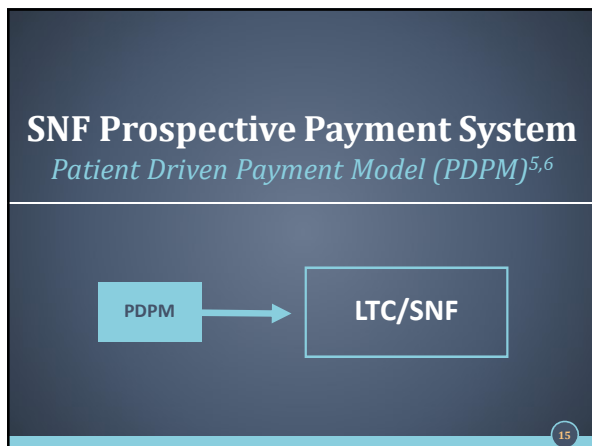

Payment and Quality Reporting
.....
1,200+ APR-DRGs (as compared to 999 MS-DRGs)
.....
18 steps to determine APR-DRG (vs 3 for MS-DRG)

11

Patient Driven Payment Model (PDPM)

- SNF residents in a Medicare Part A stay
- Five (5) day assessment will establish payment rates for entire stay
- Case mix classification system

PDPM Replaces RUG-IV
.....
October 1, 2019

HEALTH INSURANCE

16

Patient Driven Payment Model (PDPM)

Six Payment Components

- Five are case-mix adjusted
 - Physical therapy, occupational therapy, speech therapy (SLP), non-therapy ancillary, nursing
 - SLP rates adjusted for residents with texture modified diets
- Sixth is a non-case-mix adjusted component
- Resident characteristics determine classification into a case-mix group (CMG)

17

Patient Driven Payment Model (PDPM)

Non-Therapy Ancillary (NTA) Components

- Parenteral IV Feeding, Level High = 7 points
- Parenteral IV Feeding, Level Low = 3 points
- Enteral Nutrition = 1 point
- Malnutrition diagnosis = 1 point

- Total points decides payment tier for NTA category
- Still subject to Value Based Purchasing adjustments

18

Hierarchical Conditions Categories (HCC)⁷⁻⁹

Uses Risk Adjusted Factors (RAF)

A diagram with a light blue box on the left containing the text "HCCs and RAF". A blue arrow points from this box to a white box with a blue border on the right containing the text "Ambulatory Care Clinics/ACOs".

19

Hierarchical Conditions Categories (HCC)

- Value-Based Purchasing Modifier
- Risk-adjustment for Medicare Advantage and PACE (Program of All-inclusive Care for the Elderly) Plans
- Used for Accountable Care Organization benchmark budget goals
- Diseases and conditions that predict disease burden on costs and quality

20

Hierarchical Conditions Categories (HCC) Payment Points

- Points assigned to each HCC to determine the RAF
- Recalculated every year

RAF = HCC points + demographic points

➤ Not a simple addition equation → blended-risk models, coefficients, R-squared statistic models, etc.

21

Hierarchical Conditions Categories (HCC) Severity Levels

Diagnostic Groups

- If two codes in same group coded in same calendar year, CMS will choose the diagnosis with greater severity of illness within that group

- **Example:** Uncomplicated diabetes vs diabetes with nephropathy
- **Example:** Severe protein-calorie malnutrition vs moderate protein-calorie malnutrition

22

HCC 23 Protein-Calorie Malnutrition⁷ - ADULTS

HCC018	Pancreas Transplant Status/Complications	4.599	4.409
HCC019	Diabetes with Acute Complications	0.659	0.587
HCC020	Diabetes with Chronic Complications	0.659	0.587
HCC021	Diabetes without Complication	0.659	0.587
HCC023	Protein-Calorie Malnutrition	12.16	12.155

23

Protein-Calorie Malnutrition⁷ - CHILDREN

Pancreas Transplant Status/Complications	21.819	21.658
Diabetes with Acute Complications	2.386	2.091
Diabetes with Chronic Complications	2.386	2.091
Diabetes without Complication	2.386	2.091
Protein-Calorie Malnutrition	11.906	11.824

24

Protein-Calorie Malnutrition⁷ - INFANTS

Severity Category	HCC
Severity Level 3	Pathological Fractures, Except of Vertebrae, Hip, or Humerus
Severity Level 2	Viral or Unspecified Meningitis
Severity Level 2	Thyroid, Melanoma, Neurofibromatosis, and Other Cancers and Tumors
Severity Level 2	Diabetes with Acute Complications
Severity Level 2	Diabetes with Chronic Complications
Severity Level 2	Diabetes without Complication
Severity Level 2	Protein-Calorie Malnutrition
Severity Level 2	Congenital Metabolic Disorders, Not Elsewhere Classified

25

Quality Indicators

It's not only about the money

26

Adjustments Based on Case Mix Index (CMI)

Volumes	Actual	Budget
Discharges	18,542	18,883
Average Length of Stay	5.92	5.40
CMI Adjusted Average Length of Stay	2.91	2.73
Clinic Visits	506,908	516,501
Emergency Department Visits	40,056	39,609
Main OR Surgeries	11,514	11,278
OPSC Surgeries	7,371	7,707
All Payor CMI	2.03	1.98
Paid FTE/Adj Discharge/All Payor CMI	25.00	24.82

27

Risk of Mortality (ROM) and Severity of Illness (SOI)

Severity of Illness

- The extent of physiologic decompensation of an organ system or disease state

Risk of Mortality

- Medicare's estimate of the likelihood of dying for patients within a diagnostic group

28

Expected vs Actual Length of Stay (LOS)

What would the expected length of stay have been if the malnutrition was coded?

MS-DRG	TYPE	MS-DRG Title	Weights	Length of Stay	
				Geometric mean LOS	Arithmetic mean LOS
29	SURG	SPINAL PROCEDURES W/ CC OR SPINAL NEUROSTIMULATORS	3.1557	4.4	5.1
30	SURG	SPINAL PROCEDURES W/O CC/MCC	2.1797	2.3	3.0
31	SURG	VENTRICULAR SHUNT PROCEDURES W MCC	4.1829	7.2	10.1
32	SURG	VENTRICULAR SHUNT PROCEDURES W CC	2.3021	3.3	4.8
33	SURG	VENTRICULAR SHUNT PROCEDURES W/O CC/MCC	1.6977	1.8	2.3

Doley J, Phillips W. Accurate coding impacts the geometric length of stay for malnourished inpatients. JAND. 2019; 119(2):193-197.

29

Documentation

Influences payment structure in every setting

30

Adult Malnutrition Definitions

- 2012 Academy/ASPEN consensus statement criteria for adult malnutrition clinical characteristics¹⁰
 - Validation study underway
- Global leadership Initiative on Malnutrition (GLIM) criteria¹¹
 - Complements but does not replace consensus statement
- Other

31

Pediatric Malnutrition Definitions

- 2014 Academy/ASPEN consensus statement criteria for pediatric malnutrition clinical characteristics¹²
 - Validation study underway
- 2018 neonatal malnutrition indicators¹³
- World Health Organization¹⁴
- Other

32

Present on Admission (POA) Documentation

- Complication vs Co-morbidity
- Healthcare facilities want documentation to show a diagnosis was POA
- “Not their fault”
- APR-Diagnosis Related Groups (DRG): Classified into admission DRG and discharge DRG

33

Documentation - "MEAT"

Managed – Evaluated – Assessed – Treated

Where: Every care setting

Who: Physicians and Non-Physician Practitioners, RDNs, SLPs, PT, OT, Case Management, Social Work

➤ Document all diagnoses

34

Documentation Tips

- Consistent documentation between providers
- Document impact on care required and treatment plan
- Must have an appropriate intervention

35

Action Steps

-  **Learn more** about the payment model in your facility
-  **Connect** with quality coordinators, medical coders, physicians, and other healthcare leaders
-  **Develop** facility-approved malnutrition "definition" that all providers will use
-  **Track** and publish outcomes!

Credit Claiming

You must complete a brief evaluation of the program in order to obtain your certificate. The evaluation will be available for 1 year; you do not have to complete it today.

CREDIT CLAIMING INSTRUCTIONS:

1. Go to www.CE.TodaysDietitian.com/malnutrition
OR Log in to www.CE.TodaysDietitian.com and go to "My Courses" and click on the webinar title.
2. Click "Take Course" on the webinar description page.
3. Select "Start/Resume" Course to complete and submit the evaluation.
4. Download and print your certificate.
